Breakout Modules - Custom

Silver Engineering, Inc. manufactures a wide variety of standard and custom Breakout Boxes and cable adapter assemblies. Custom versions of Breakout Boxes can be integrated to meet your requirements. SEI has built special versions of Breakout Boxes for customers who required no toggle switches, test points with isolation resistors, custom connectors, special circular connectors, and Breakout Monitor Boxes that are intended to operate in a vacuum chamber using components with low out-gassing properties.

SEI can quote a custom Breakout Box using the chart below as a preliminary outline. With the component and electrical requirements identified, a proposed concept can be provided.

CUSTOM BREAKOUT REQUIREMENTS

ITEM	Specify		J1	J2	Comments
1	CONNECTOR	Type Of			
2	CONTACT	Male or Female			
3	CONTACT	Qty of Contacts
